

Fabien Rouget

Software Engineer • Tech Lead • C# • Freelance

10 years of .NET backend experience on high-volume distributed systems, from architecture design to team mentoring.

Expertise

C# Backend

C#/.NET APIs and event-driven systems designed for scalability and high throughput.

Architecture & Software Quality

Design and implementation of scalable, maintainable architectures with a strong focus on software quality, testing, observability, and performance.

Technical Leadership & Scoping

Technical scoping, architectural trade-offs, team mentoring, and reliable production delivery.

AI-Assisted Development

Leveraging AI tools and agentic workflows to accelerate development, code analysis, and delivery.

Experience

Software Engineer

Betclic - Bordeaux - May 2025 -> Present (1 yr 4 mos)

Redesign of the transaction management service into a distributed multi-service architecture.

- Decomposed a monolith into specialized services to improve system scalability and maintainability.
- Executed a zero-downtime rollout from the legacy system to the new architecture.
- Replaced synchronous calls with event-driven communication to strengthen resilience and decoupling.

.NET 8

Cosmos DB

AWS Cloud

Azure Container Apps

Jenkins pipeline

Datadog

Agentic AI development

Claude Code

GitHub Copilot

Cursor

Tech Lead

Floa - Bordeaux - March 2023 -> May 2025 (2 yrs 2 mos)

Design of subscription validation controls and a graph pipeline for fraud detection.

- Designed and shipped validation APIs integrated into the customer subscription flow.
- Modeled and implemented databases tailored for caching, master data, and operational workloads.
- Built and maintained an ETL pipeline feeding Neo4j to detect fraudulent communities.
- Structured the domain architecture and secured its long-term evolution.
- Provided technical leadership to the team and aligned implementation standards.

.NET 6

Neo4j - Cypher

Redis

SQL Server - MongoDB

RabbitMQ

Kibana - Dynatrace - Grafana

Software Engineer

Betclic - Bordeaux - January 2022 -> March 2023 (1 yr 2 mos)

Redesign of a user activity collection and aggregation pipeline.

- Built the end-to-end ETL pipeline, from event ingestion to aggregate computation.
- Deployed a cloud architecture on AWS to handle high throughput and simplify operations.
- Produced and exposed aggregates in Snowflake for analytics workloads.
- Developed back-office APIs to make the data actionable.

.NET 6 - Python

AWS: ECS, SQS, SNS, S3

Snowflake - DBT - MongoDB

GitHub, Jenkins, Terraform

Software Engineer

Believe - Paris - January 2021 -> January 2022 (1 yr)

Development of a Big Data platform, from data collection to data exposure.

- Built the end-to-end ETL pipeline to ensure reliable data flows.
- Deployed a cloud architecture on AWS to industrialize the platform.
- Implemented CI/CD pipelines across the entire scope.

Python

AWS: StepFunctions, Lambda, DMS, S3, RDS Aurora, Batch

Snowflake - SQL - DBT - Sqitch

GitLab - Pulumi

Tech Lead

Cdiscount - Bordeaux - August 2018 -> December 2020 (2 yrs 5 mos)

Technical leadership of e-commerce backend services, from architecture to production.

- Designed the microservices architecture for the Octopia product catalog.
- Developed the internal tracking backend.
- Developed the backend for the sponsored products platform.
- Improved reliability of the catalog export feed to Google Shopping.
- Led multiple teams (2 to 5 developers) and secured production deliveries.

Microservices Architecture - REST API

.NET Core - C# - Kubernetes

MongoDB - PostgreSQL - SQL Server

Apache Kafka

Apache Solr

TFS - Azure DevOps - JIRA

CI/CD - Sonar - SpecFlow

Liquibase

SCRUM

.NET Developer

Cdiscount - Bordeaux - September 2016 -> August 2018 (2 yrs)

Product catalog migration to a new data model and redesign of associated systems.

- Designed and implemented the databases for the new data model.
- Enhanced web services to expose and leverage the product catalog.
- Adapted front-end applications to ensure a seamless transition with no functional disruption.

TFS - .NET Framework - WCF

SQL Server

Sonar - Kanban

Education

Master's Degree in Computer Science (Diplôme d'Ingénieur)

3iL Engineering School, Limoges - 2016

Bachelor's Degree in Computer Science

University of Limoges - 2014

Beyond the code

- Avid BÉPO keyboard layout advocate
- Judo black belt
